A thatched umbrella which is openable and closcable, which umbrella comprises:

- (a) a continuously woven one-piece circular thatch, <u>prepared</u> on a jig having a plurality of spaced radii, each of which radii has a series of uniformly spaced guide pins along the length thereof, which guide pins serve to retain the thatch material in place during the course of the circular weaving,
- (b) an umbrella frame having a series of ribs, each of which is interconnected to a strut, each of which struts is interconnected to a hub, said hub disposed upon a pole,
- (c) an umbrella canopy, having an exterior surface, overlaying and connected to said frame, said continuously woven one-piece circular thatch being disposed upon said canopy's exterior surface, and being connected to said frame's ribs through said canopy, and
- (d) means for opening and closing said frame disposed on said pole.

18 Please enter amended claim 2 to read,

- The device of claim 1 wherein the continuously woven one-piece circular thatch is configured as an annulus.
- 21 Please enter amended claim 3 to read,
- The device of claim 1 wherein the continuously woven one-piece circular thatch is configured as a disk.

24 Please enter claim 10 to read,

The thatched umbrella of claim wherein the umbrella canopy is made of acrylic fabric, the circular one-piece woven thatch is configured as an annulus, and a finial is disposed on the pole.

Please enter claim 11 as follows,

- 29 11. A thatched umbrella which is openable and closable on demand, which umbrella 30 comprises:
  - (a) continuously woven one-piece circular thatch,
- 32 (b) an umbrella frame having a series of radii, each of which is interconnected to a
  33 strut, each of which struts is interconnected to a hub, said hub disposed upon a

(d) 

pole, an umbrella fabric carlopy having an exterior surface and an interior surface, the interior surface overlaying said frame, the canopy being connected to said frame, said continuously woven one-piece circular thatch being disposed upon said canopy's exterior surface,

MARK C. JACOBS

- means for opening along said from disposed in said pole, and
- a finial disposed on the top of said pole. (e)
